

Designer Keyboard and Mouse Shortcuts

Version History

- Version 1.0 (Jan 2019) – Initial release

Introduction

This document describes keyboard shortcuts which can be used in Designer. By using these key combinations, designing and completing projects can be done more quickly and efficiently.

Shortcuts

Shortcuts by page

For each page in the tool navigation bar, the available shortcuts are specified below

Designer Navigation bar	Action	Shortcut
Sites list	Open project in a new tab	Ctrl + click on a project
Site modeling 2D view	Select draw tool	Double click (anywhere on map)
	Exit draw tool and go to select tool	Right click (anywhere on map)
Site modeling 3D view	Select all connected roof edges for setting the roof height	Double click an edge/vertex
	Flush/unflush an obstacle	Double click the obstacle
	Select multiple roof edges	Ctrl + click all edges
PV placement	Select and switch between facets	Double click a facet
	Select specific module	Double click a module or click a module group then click a single module
Electrical design	Add modules to an existing string	Double click string + drag mouse over modules to be added
	Unselect inverters and go to select tool	Esc
	Remove modules from an existing string	Ctrl + drag mouse over assigned module

Map Shortcuts

In all pages where a map is used, the following shortcuts are available on the map:

Action	Shortcut
Point map north	N
Zoom in/out	+/-, or use mouse scroll wheel
Rotate view	Ctrl + arrow keys, or click and drag mouse scroll wheel
Pan	Alt + arrow keys, or click and drag right mouse button
Reset view point (zoom & rotation)	R
