Commercial Offering for Solar Investors & System Owners
About SolarEdge

About us
In 2006, SolarEdge revolutionized the solar industry by inventing a better way to collect and manage energy in PV systems. Today, we are a global leader in smart energy technology. By deploying world-class engineering capabilities and with a relentless focus on innovation, we create smart energy products and solutions that power our lives and drive future progress.

Vision
We believe that continuous improvement in the ways we produce and manage the energy we consume will lead to a better future for us all.

Bankability
- Approved by major banks and financial institutions worldwide
- SolarEdge (SEDG) is traded on NASDAQ
- Our financial strength and stability, combined with our cutting-edge technology, has propelled us to become one of the largest inverter manufacturers in the world.

Global outreach
- Systems installed in over 130 countries across five continents
- Sales via leading integrators and distributors
- Follow the sun call centers
- Local teams of sales, service, marketing, and training experts
- Global manufacturing capabilities with tier 1 electronic manufacturing service companies

Award-winning technology
- Over 3.5 million inverters and 83.9 million Power Optimizers shipped worldwide
- SolarEdge’s Monitoring Platform continuously tracks over 2.45 million installations across the globe

Shipping since 2010

Corporate social responsibility
As a global leader in smart energy technologies, SolarEdge is committed to a sustainable world and is in full compliance with international standards on quality and control, ethical conduct, and environmental protection.

Bankability
- Approved by major banks and financial institutions worldwide
- SolarEdge (SEDG) is traded on NASDAQ
- Our financial strength and stability, combined with our cutting-edge technology, has propelled us to become one of the largest inverter manufacturers in the world.

Patents
SolarEdge has a vast portfolio of intellectual property, with hundreds of awarded patents and patent applications.

Product reliability
- 25-year Power Optimizer warranty and 12-year inverter warranty, extendable to 20 years
- SolarEdge products and components undergo rigorous testing, and have been evaluated in accelerated life chambers
- Reliability strategy includes proprietary application specific ICs (ASIC)

About SolarEdge

Annual Revenue ($ Millions, Calendar Year)

- 2017: 607.8
- 2018: 937.2
- 2019: 1,425.7
- 2020: 1,460
- 2021: 1,963

CAGR 26.5%
The Importance of Inverter Selection

Commercial rooftop installation cost breakdown*

Inverters account for less than 10% of the system cost but:
- Manage 100% of system production
- Influence up to 20% of system cost
- Control O&M expenses through PV asset management solutions

Therefore, the inverter selection is critical for the long term financial performance of a PV system as it can maximize energy production and reduce lifetime costs.

* Based on NREL 2017
Increased Revenue

More energy from each module
In a PV system, each module has an individual maximum power point. Differences between modules are unavoidable in commercial installations. With traditional inverters, the weakest module reduces the performance of all modules. With SolarEdge, each module produces at its maximum ability at all times, ensuring greater energy yield from the entire system.

Power losses can result from multiple factors, including:

Manufacturing tolerance mismatch
The warranted output power range for PV modules received from a manufacturing plant may vary greatly. A standard deviation of ±3% is sufficient to result in ~2% energy loss.

Soiling, Shading & Leaves
Module soiling, from dirt, bird droppings or snow, contributes to mismatch between modules and strings. While there may be no obstructions during site design, throughout a system’s lifetime, a tree may grow or a structure may be erected that creates uneven shading.

Uneven module aging
Module performance can degrade up to 20% over 20 years, however, each module ages at a different rate, causing aging mismatch, which increases over time.

Advanced Asset Management

**Full visibility of your system’s performance**
- Full visibility into your assets through module-level monitoring – free for 25 years
- Automatic alerts on system issues, pinpointed on a virtual site map

**Anytime, anywhere**
- Complete system status on your mobile device (iOS or Android)

**Future compatibility and warranty**
- 25-year Power Optimizer warranty; 12-year inverter warranty; Low cost warranty extension to 20 years
- A variety of module models can be used for future replacement and extension
- UL1741 SA certified, for CPUC Rule 21 grid compliance
- For agricultural areas – products are certified for ammonia resistance

**For system lifetime**
- Automatic performance reports
- Remote troubleshooting and enhanced maintenance capabilities
Protecting Your Asset

Advanced safety features
During installation, maintenance and grid or inverter shutdown, Power Optimizers are designed to automatically switch into safety mode, in which the output voltage of each module will be reduced to 1V. String voltage will be maintained well below risk levels. The SafeDC™ feature meets advanced safety standards (rapid shutdown NEC 2014/2017/2020 compliant).

Protection of people and property
Module-level shutdown is designed to occur automatically in either of these cases:
- A building is disconnected from the electrical grid
- The inverter is turned off

Arc fault detection
SolarEdge inverters comply with the UL1699B arc detection standard designed to mitigate the effects of some arc faults that may pose a risk of fire.

Built-in temperature monitoring
Thermal sensors integrated into the system detect faulty wiring that can potentially cause electric arcs.

Favored by global solar insurance companies
SolarEdge’s multi-layered, holistic safety approach make it a favored PV solution of worldwide solar insurance companies. It also meets leading property insurance company FM Global’s DS 1-15 engineering requirements.

Note: Safety functionalities described above may vary between different inverter models and firmware versions, and are applicable when inverter is turned on.
29.5GW of systems shipped worldwide

**Ground mounts**

**Industrial rooftops**

**Farms & agriculture**

**Public buildings**

**Carports, floating systems & safety**
Ground Mounts

Turkey, 5MW

**Floatovoltaic Systems**

**The Netherlands, 780kW**  
De Krim Holiday Resort, Texel Island  

“De Krim Resort invested in a solar PV system to be environmentally friendly and generate our own electricity. Thanks to asset reuse, high performance, and a positive impact on water quality, the floating installation is expected to far exceed the estimated return on our investment.”  
> Iwan Groothuis, Managing Director, De Krim Resort

**The Netherlands, 232kW**  
Everstekoog Sewage Treatment Plant, De Koog  

“The use of floating solar PV at water treatment facilities that have available water bodies and need to use electricity for water treatment operations is gaining traction. The floating solar park at the Everstekoog water treatment site powers all public street lamps (LED) on Texel Island.”  
> Nicol Schermer, Manager, Texel4trading

**United States, 386kW**  
Far Niente Winery, California  

The 386kW installation, partially ground-mounted and partially floating on pontoons atop the winery’s irrigation pond, has become a net-zero energy establishment. The floating system enables the winery to preserve nearly an acre of vineyard land, and helps to reduce the amount of water lost to evaporation by shading the previously uncovered pond.
Commercial System Diagram

The SolarEdge solution consists of inverters, Power Optimizers, and a Monitoring Platform. The technology provides superior power harvesting and module management by connecting Power Optimizers at the module level. The ability to connect two modules to just one Power Optimizer, combined with DC to AC conversion and grid interaction being centralized at a simplified PV inverter, maintains a competitive cost structure.

2:1 Power Optimizer configurations
- Module-level MPPT - no mismatch power losses
- Strings of uneven lengths, modules on multiple azimuths & tilts
- Compatible with all three phase SolarEdge inverters
- SafeDC™ - automatic module-level safety shutdown

9kVA - 120kVA inverters
- Native support for both 208Vac and 277/480Vac grids
- Specifically designed to work with Power Optimizers
- High efficiency
- Simple and reliable
- Easy to install
- Advanced safety features

Monitoring Platform
- Full visibility of system performance
- Access via browser or any Android, iOS smart phone or tablet
- Automatic performance and alert reports

SolarEdge data logger
Connection of environmental sensors with several wireless communication options, providing monitoring and control

Performance monitoring
Calculate site performance ratio and measure environmental conditions, using environmental sensors or a satellite-based service.

Grid interaction
Supports power control, e.g. zero export limitation, local and remote active/reactive power control, inverter AC relay control for secondary grid protection; low voltage and frequency ride through.
SolarEdge is a global leader in smart energy technology. By leveraging world-class engineering capabilities and with a relentless focus on innovation, SolarEdge creates smart energy solutions that power our lives and drive future progress.

SolarEdge developed an intelligent inverter solution that changed the way power is harvested and managed in photovoltaic (PV) systems.

The SolarEdge DC optimized inverter maximizes power generation while lowering the cost of energy produced by the PV system. Continuing to advance smart energy, SolarEdge addresses a broad range of energy market segments through its PV, storage, EV charging, UPS, and grid services solutions.
